

The New DLSSL

Demountable L-Type Swivel Lock

RWM offers a wide selection of swivel lock options. We are excited to add another demountable option to this category to complement the weld on version which has been available for years. The DLSSL lock is intended for use in more demanding medium-heavy duty applications such as aerospace ground support or heavy assembly plant floors. Demountable swivel locks are designed for field installation and/or ease of replacement on existing models.

The L-type swivel lock is stronger than the standard demountable swivel lock with a ring and lowers the potential of any foreign object debris which can occur when rings loosen and fall off when heavily used. Additionally in more rigorous and abusive applications the ring type can be damaged or worn so that it develops twisted protruding metal which creates a potential safety hazard. The DLSSL is a sturdy, L-shaped metal actuator that can withstand more severe conditions.

MEDIUM DUTY

MODEL	FOR USE WITH	FINISH
40-65-DLSSL	46, 47, 48, 65 series	Type I Silver Zinc Finish

HEAVY DUTY

MODEL	FOR USE WITH	FINISH
40-75-DLSSL	75 Series casters	Type II Gold Zinc Finish
40-76-DLSSL	76 Series casters	Type II Gold Zinc Finish
40-85-DLSSL	85 Series casters	Type II Gold Zinc Finish
40-95-DLSSL	95 Series casters	Type II Gold Zinc Finish
40-125-DLSSL	125 Series casters	Type II Gold Zinc Finish

Custom sizes and configurations are available.

The Heavy duty sizes are also available with a Powder Coated finish.
