

RK-48 SERIES CASTER

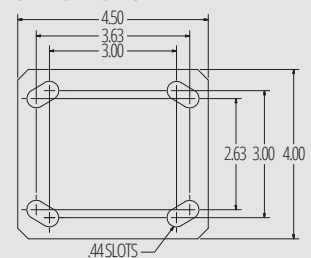

RWM's new Rol Kleen 48 series casters are designed to eliminate 50% of the thread buildup common with conventional casters and dramatically reduce maintenance of both the swivel section and wheel of the caster. RWM now offers the RK-48 Series caster, which combines the RK Series caster design with the Freedom 48 Series' completely maintenance free raceway. With this raceway, the RK-48 offers ultra-quiet

and precise operation. Together, in the RK-48 Series, these designs result in a product that is designed for ease of movement, noise reduction, and significant reduction of thread or fiber build up in all applications where minimizing the occurrence is beneficial.

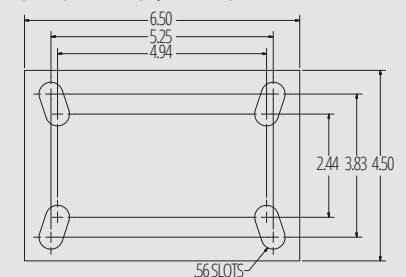

PRODUCT FEATURES

- Swivel Section:** Sealed precision swivel bearing.
- Capacity:** Up to 500 lbs.
- Axle:** 1/2" diameter bolt.
- Finish:** Zinc plated to protect against corrosion.
- Wheels:** Fits up to 2" wide wheels.
- Thread Guard:** Precision fitting full wheel thread guards to reduce fiber build-up around the wheel.

STANDARD TOP PLATE

OPTIONAL 42ST/42RT TOP PLATE
